N every manufacturing business the production often exceeds the demand, and the surplus is invariably equal in quality and design or style to the merchandise sold at regular prices. Once the season's orders are filled, the manufacturers are willing to accept half price for their overproduction in order to get it out of the way of the next season's output. They are now working on patterns for next year, and we took all the present season's designs off their hands at half price, enabling us to offer: Fourth Floor.
